

**Postdoctoral Position
Department of Animal Sciences
The Ohio State University
Wooster, OH**

A postdoctoral position is available immediately in the Department of Animal Sciences at The Ohio State University, Wooster, OH. The position is part of an ongoing USDA NRI funded study on the role of proteoglycans in regulating skeletal muscle growth and development. Ongoing studies are focused on the signal transduction mechanisms utilized by the heparan sulfate proteoglycans to regulate the muscle cell response to fibroblast growth factor 2. A Ph.D. is required with experience in one or more of the following areas: cell signaling, molecular biology, biochemistry, or animal science. Position is fully funded by a USDA NRI grant including benefits. Send curriculum vitae, statement of research interests, and the names of three references to: Dr. Sandra Velleman, Department of Animal Sciences, The Ohio State University, 1680 Madison Ave., Wooster, OH 44691 (Tel: 330-263-3905; FAX: 330-263-3949; Email: velleman.1@osu.edu).
